Maine Manufacturing Reveals its New Manufacturing Facility

Sanford, (ME) June 3, 2010 — Maine Manufacturing LLC held an open house and grand opening celebration today, over 100 people were in attendance. Located in Sanford, ME the company sits on the breaking edge of the life sciences industry.

Founded in 2007 Maine Manufacturing recently completed a tremendous growth period. A customized manufacturing partner for the life science industry, Maine Manufacturing spent 2009 in negotiations with the healthcare division of General Electric. GE had purchased Whatman Inc, a company that employed nearly 250 people in Maine and had planned to send the jobs overseas. Maine Manufacturing's negotiations allowed the company to grow from 2 to 90 employees and preserved many of the jobs which GE had been planning to ship overseas.

Bill Emhiser the CEO at Maine Manufacturing opened the celebration welcoming guests by saying, "We are excited to be showcasing our 100,000 square foot world-class life sciences facility for the first time."

Another participant in the activities of the day was Senator Susan Collins. Collins who spoke during the opening celebration said, "Maine Manufacturing is truly one of Maine's great success stories. But what you are doing here goes beyond creating jobs. You are building an industry of the future. The quality of your products, your innovation, and your collaboration with Maine's research community are keeping our state on the cutting edge of this exciting field."

Members of the press are invited to the grand opening/ unveiling of the facility which will begin at

11AM.
